

Approved by the FDA for cosmetic use. BOTOX is used to inhibit muscle movement. This prevents the wrinkling of the skin in those areas treated. Botox can last for a period of 3-6 months.

Smooth away moderate to severe wrinkles and add volume to the face, especially around the nose and the mouth. The result is instantaneous, producing a natural look.

## BELOTERO®

The versatility of the product makes it strong enough to handle deep wrinkles yet is soft enough to treat more delicate areas such as vertical lip lines.

A new generation of injectable gel filler which offers immediate, longer lasting results. Developed for its durability and longevity. This procedure works best for smile lines, folds, around the mouth, and forehead lines.

Zeltiq coolsculpting destroys fat cells through a process called cryolipolysis which targets, cools, then eliminates fat cells without damage to neighboring tissue. This FDA approved procedure treats fat bulges resistant to diet and exercise. Coolsculpting is ideal for love handles, abdominal fat, and back fat. This non-invasive procedure is exceptionally safe and there is minimal down time.

After

## Melasma Treatment

Laser toning is the clinical application of laser energy to reduce visible skin pigmentation. Laser toning also improves the texture and unevenness of the skin, as well as reducing pore size. Multiple treatments recommended.

Jumpstart the rejuvenation process and add your platelet rich plasma to your Dermapen procedure. It is a fractional micro-needling device for skin rejuvenation. It improves skin texture, evenness, wrinkles, and scars with minimal downtime.

## EXILIS For Skin Tightening

Exilis uses safe and sophisticated thermal energy to induce positive changes in your skin and body. This treatment reduces wrinkles, tightens skin, and provides effective body contouring with no pain and no downtime. It is scientifically proven, FDA approved, and clinically tested. A series of 4 treatments is recommended.

## Laser Hair Removal

Laser hair removal is the permanent reduction of hair growth. It uses light energy to destroy hair follicles. Multiple treatments are needed for optimal results.

## OC Vein Center

*Experienced, Affordable, and Effective!*

### Free Vein Evaluations!

#### Spider Vein Therapy

Sclerotherapy is used to treat unsightly spider veins. A tiny needle is used to inject the veins with a medication that results in destroying the veins, making them no longer visible.

#### Endovenous Laser Ablation

Endovenous Laser Ablation is used to treat varicose veins. A small laser fiber is inserted, through a needle stick in the skin, into the damaged vein. Pulses of light are delivered inside the vein, which causes the vein to collapse and seal shut. This treatment is FDA approved and done in office under local anesthesia. Patients return to normal activity right away with minimal discomfort.

### Complimentary Consultations!

Located in the Brea Center  
2866 E. Imperial Highway  
Brea, CA 92821

#### We Are Pleased to Offer:

 **CareCredit**<sup>SM</sup>

We accept Care Credit with no interest financing for 6 or 12 months.

Day	Hours
Sunday	Closed
Monday	10:00 - 5:00
